Pravin Gavali

.Net Full Stack Developer

Email: gavalip000@gmail.com | Contact: +91-9226637515 | Location: Pune

Professional Summary

.NET Full Stack Developer with 4+ years of experience in C#, ASP.NET Core, .NET, AngularJS, Angular20, React.js and RESTful APIs. Experienced in developing enterprise applications across **Healthcare domains** using Oracle 19c and SQL Server. Skilled in **feature development, enhancements, requirement analysis, debugging, production issue resolution, and performance optimization**.
Experienced in **Agile Scrum and TFS**, with working knowledge of **Git, GitHub, and Azure DevOps**.
Familiar with **GitHub Copilot** for code development, debugging, and improving developer productivity.

Technical Skills

- **Programming Languages:** C#, JavaScript, TypeScript
- **Backend Technologies:** ASP.NET Core,.NET, .NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework
- **Frontend Technologies:** Angular 14,18,20, AngularJS, React.js ,HTML5, CSS3, Bootstrap, jQuery, AJAX
- **Databases:** Oracle 19c, SQL Server, MySQL
- **API & Integration:** RESTful APIs, JSON, Swagger, Postman
- **Version Control :** TFS, Git, GitHub
- **ALM & Project Management:** Azure DevOps, Jira, Bit bucket
- **Development Tools:** Visual Studio 2022, Visual Studio Code, GitHub Copilot
- **Methodologies:** Agile Scrum, SDLC
- **Core Concepts:** Object-Oriented Programming (OOP), Exception Handling, RESTful APIs, Debugging, Responsive Web Development

Professional Experience:

T-SYSTEMS INDIA ICT PVT.LTD (Thy Grace Consultant) **Jan 2025 - Present**

Project1:I Med One – Hospital Information System

- Developed and enhanced enterprise healthcare application modules using **C#, ASP.NET Core, .NET, AngularJS, Angular 20 and Oracle 19c**, contributing across both frontend and backend layers.
- Worked extensively on **Timeline, Observation Chart, Journal, Care Score, and Dashboard** modules, implementing new features and enhancing existing functionalities based on business requirements.
- Developed and maintained **RESTful APIs** using ASP.NET Core/Web API and integrated them with Angular-based user interfaces.
- Contributed to the ongoing **Angular application migration**, working with **Angular 20 and modernized .NET components** while maintaining and enhancing existing AngularJS and .NET Core functionality.
- Designed and implemented responsive and user-friendly UI components using **AngularJS, Angular 20 and TypeScript**.
- Analyzed and resolved functional and production issues by performing **root cause analysis, debugging, and code-level fixes** across frontend, backend, and database layers.
- Worked with **Oracle 19c** for data analysis, SQL queries, database changes, and troubleshooting application-related data issues.
- Optimized application functionality and database operations to improve **performance, reliability, and user experience**.
- Participated in **requirement analysis, task estimation, development, unit testing, code reviews, and deployment/release activities** throughout the software development lifecycle.

- Collaborated with **QA, business teams, and cross-functional stakeholders** to understand requirements, resolve issues, and deliver quality enhancements within Agile Scrum sprints.
- Used **TFS** for source control and project development activities, with familiarity with **Git, GitHub, and Azure DevOps**.
- Leveraged **GitHub Copilot** as a development productivity tool to assist with code generation, debugging, and exploring implementation approaches.

Technology Used : C#, ASP.NET Core, .NET, AngularJS, Angular 20, TypeScript, JavaScript, Web API, RESTful APIs, Oracle 19c, HTML5, CSS3, Bootstrap, TFS, Azure DevOps, Agile Scrum, Visual Studio, Visual Studio Code, GitHub Copilot

---

DEFINE LABS PVT.LTD **Feb 2024 to Dec 2024**

Project 2: Club Caddie

Project Overview:

Club Caddie is a leading cloud-based software for managing golf course operations. It offers a complete suite covering employee management, restaurant operations, tee booking, events, and range tracking. The platform is cost-effective, easy to use, and built by golf industry professionals.

Responsibilities:

- Developed and enhanced **booking, membership, and event management modules** using **ASP.NET Core, Web API, Angular, and SQL Server**.
- Implemented **real-time booking and availability functionality** to support golf course scheduling and reservation workflows.
- Developed **reporting dashboards** to provide insights into revenue, user activity, and operational data.
- Worked across **frontend and backend layers**, developing responsive UI components and integrating RESTful APIs with Angular applications.
- Participated in **task estimation, issue analysis, debugging, and resolution**, collaborating with team members to deliver features within Agile development cycles.

Technology Used : C#, .NET, .Net Core, MVC, Angular 14, SQL Server 2017, React, Git, GitHub, Jira, Bit bucket, Visual Studio.

SMART SOFTWARE SERVICES PVT.LTD **June 2022 to Feb 2024**

Project 3: Healthcare Appointment Scheduling System

Project Overview:

The **Healthcare Appointment Scheduling System** is a web-based application that simplifies booking and managing appointments with medical practitioners. It provides a user-friendly interface, real-time availability, and automated reminders for a seamless patient experience.

Responsibilities:

- Developed and enhanced **appointment booking and scheduling modules** using **ASP.NET MVC, .NET Core, Angular, and SQL**, supporting healthcare provider and patient workflows.
- Implemented **real-time doctor availability** functionality to enable efficient appointment scheduling and improve user experience.
- Developed **patient profile management, notification, and administrative modules** for managing appointments, schedules, and patient records.
- Designed responsive and user-friendly interfaces using **Angular, HTML5, CSS3, Bootstrap, JavaScript, AJAX, and jQuery**.
- Participated in **requirement analysis, development, debugging, testing, and issue resolution** throughout the application development lifecycle.

Technology Used : C#,.NET, .Net Core, Angular 14, SQL, MVC ,HTML5,CSS3,Bootstrap, JavaScript, Visual Studio, VS Code Ajax, jQuery
